

SPOTLIGHTS YOUR PRODUCT

Maximum Packaging Safety and Convenience

Skin Packaging concept

As a one-stop-shop supplier, we offer a complete portfolio of bottom films specifically designed to meet the requirements of Skin lidding films. With these holistic packaging concepts, we enable our customers to achieve maximum process and packaging reliability.

Our Multi SV Skin can be combined with different bottom films: The offering ranges from transparent or opaque film solutions to paper fiber-based concepts: Ecopet is an APET-based rigid film, equipped with particularly good thermoforming properties.

Ecocraft Shape is a paper bottom web that can be thermoformed up to 15 mm. Ecocraft Skin is also paper fiber-based and can be formed around the product during the packing process.

The special feature of paper fiber-based bottom web: After removal of the product, the film can be separated from the paper fiber-based bottom web. In this way, the individual components can be fed into the respective recyclable material cycles.

Added Value

PACKAGING CONCEPT

Single source: System application consisting of top and bottom web

HIGH FLEXIBILITY

Different packaging variants

HIGH PROCESS RELIABILITY

Very good thermoforming and sealing behavior for optimized productivity

SUDPACK

SKIN PACKAGING CONCEPTS IN DETAIL

Multi SV Skin top web 75 µ, 100 µ, 125 µ, 150 µ

Combinable with the following Skin bottom webs

Ecopet (APET/EVOH) 250 µ - 450 µ

Ecocraft Skin 400 g/m² + 40 µ

Ecocraft Shape 326 g/m²

Applies to all bottom webs

Sealing layer PE, peelable

Advantages

- ✓ Thanks to different sealing systems, Skin films from SÜDPACK can also be sealed against mono bottom films that meet the requirements for recyclability.
- ✓ The Product can be presented hanging, lying or standing.
- ✓ Thanks to a maximum product protection, the innovative packaging concept is ideal for e-commerce.
- ✓ We enable an optimized packaging experience for the consumer through clean, consistent and easy opening behavior.
- ✓ The SÜDPACK Skin packaging concept offers the best possible process and packaging security.

PRODUCT APPLICATIONS

PACKAGING TECHNOLOGY

Process-reliable processability on all standard skin thermoforming lines
